Matrix42 Software Asset Management for SaaS

Software Asset Management for SaaS offers additional data providers to connect to public cloud providers retrieving information that is essential for compliance.

Description

Software Asset Management for SaaS provides a set of tools integrating your data from cloud providers directly into your Software Asset Management.

-
    - **Adobe Cloud:**
        - Import your subscriptions and assigned user accounts
        - Create full transparency about your assignments in your Adobe cloud.
        - Data provider is provided as 'Adobe Data Provider' extension in Matrix42 Extension Gallery (extensions.matrix42.com).

    - **Microsoft 365:**
        - Import your subscriptions and assigned user accounts into Matrix42 Enterprise Service Management
        - Create full transparency about your M365 assignments.
        - Data provider is provided as 'Microsoft 365 Inventory' extension in Matrix42 Extension Gallery (extensions.matrix42.com).

    - **Microsoft Azure Hybrid Benefit for Windows and SQL Server:**

- Manage your Hybrid Benefit compliance avoiding financial risks and overspending.
- Import virtual machines running Windows Server as OS or having SQL Database service from your Azure tenants.
- Data provider is provided as 'Azure Hybrid Benefit' extension in Matrix42 Extension Gallery (extensions.matrix42.com).

Note: All extensions additionally require subscription "Digital Workspace Platform" for using the "Service Connection" feature from DWP platform.
