MATRIX42 MARKETPLACE PRODUCTS

Recurring Tasks

With this AddOn you have the possibility to create fully automated recurring tasks according to a freely definable schedule.

Description

Some tasks in your company must be repeated regularly and their execution must be documented.

Basically, there is a Matrix42 standard function - one recurring execution can be configured per task. Unfortunately, this standard function has a major disadvantage in that each repetitive task is created immediately after the current task is closed and not at the set time.
With our "Recurring Tasks" addon we have solved this challenge in the UUX UI. You create task templates as usual.
For each task template you can configure one or more schedules of your choice. The schedule configuration is done via the Matrix42 standard schedule dialog.
Only when the time according to the schedule is reached, the tasks are automatically created by the system.

Important hint: AddOns are implemented on the customer system by Cubefinity after ordering and coordination of dates with the customer. Therefore no downloads are stored!

Additional information

AppFabric Required	No
Digital Workspace Platform (DWP) Compatibility	10.x, 11.x, 9.0, 9.1
License metric	Per Installation
Manufacturer	Cubefinity GmbH
Contract type	Subscription
