Matrix42 UEM Enterprise Mobility Management (English)

The participants receive extensive training in the use of the UEM Enterprise Mobility Management solution from Matrix42. You will gain a deep insight into the basics of device management. The training will be held in english.

Description

Training for Matrix42 UEM Enterprise Mobility Management

Learning Objectives

In this 2-day training participants will be comprehensively trained in the use of the Enterprise Mobility Management / Mobile Device Management solution from Matrix42 as part of Secure Unified Endpoint Management and gain a deep insight into the basics of endpoint management via Matrix42 UEM Enterprise Mobility Management.

A fixed component of the training course is the configuration and connection to the major operating system manufacturers Apple, Google and Microsoft. After successful configuration, the usual device management tasks are discussed, such as distributing applications, profiles and restrictions. Special tasks such as setting up the Android Enterprise and Apple device enrollment program are also part of this training. Practical examples are used to show how you can take full advantage of the possibilities with just a few steps. (duration 2 days)

Target Audience

Project managers, workspace or IT administrators, business users / business managers of the

HelpDesk / IT services departments
